# Low Carbohydrate Foods

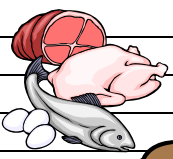

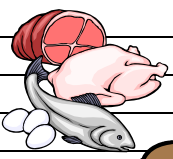

Low carbohydrate foods have 5 or fewer grams of carbohydrate. The foods in this list do not have the immediate effect on blood glucose level that carbohydrate-containing foods do, but they still provide calories (in most cases) and, in some cases, fat. For this reason, portion sizes of these foods should be carefully observed. These foods should be limited to the portion size listed below if used for snacks without insulin.

## Reading Food Labels

The nutrition facts panel on the food label is the best source of accurate carb information. If a food item has a label, please use the information on the label.

The carbohydrate information on a food label is for the portion size listed on the label, found just under NUTRITION FACTS. The following information to the right lists the grams of carb that this food item contains for one serving (ex. 1 cup = 11 grams). Keep in mind that the grams of sugar, dietary fiber, other carbs, and sugar alcohols are included in the Total Carbohydrate.
