Why take the exam?
CNOR credentialing represents a level of professional achievement and a demonstrated knowledge of clinical competence and practice standards. Becoming certified as a CNOR makes you a leader as well as a role model in the healthcare community at large and a steward for the operating room professional community. Your credentials reflect a deep personal commitment and sense of accomplishment.

Course Description
This two-day review provides an overview of the key elements of Operating Room Nursing. Included will be elements of preoperative, intraoperative, and post operative nursing all included on the test. Topics will include assessment of the pre-op patient, sterilization, pharmacology, and concepts in pediatric OR nursing. Test taking strategies will be discussed. At the completion of this workshop, the participant should be able to:

- Recognize and expand knowledge of operating room nursing to prepare for certification.
- Develop a strategy for test preparation based on the CNOR blueprint.
- Learn test taking strategies to conquer the CNOR certification exam.

Requirements for CNOR Testing
- 2 years as an operating room nurse
AND
- 2400 hours of practice
- NO BSN required
- Currently licensed and in good standing
- Candidate must be practicing in a perioperative nursing role either full or part-time at the application deadline
