IU Health Home Care

Complete patient care in the comfort of home.

Indiana University Health Home Care is dedicated to promoting independence and self-care for patients in the home. Home care can help improve patient outcomes as well as reduce hospital readmission and emergency room visits. This translates into lower medical bills for patients and allows them to return to their normal routine much quicker.

IU Health Home Care services are available for your patients of all ages—newborn to elderly. Our team of nurses, pharmacists, therapists and dietitians work with you to develop customized treatment plans based on your patient’s individual needs.

Benefits
- Reduced length of inpatient care
- Increased patient compliance for improved outcomes
- Reduced hospital readmissions
